

Bury Turfcare Group

Does your Marking time go to extra time?

The Good.

The Bad.

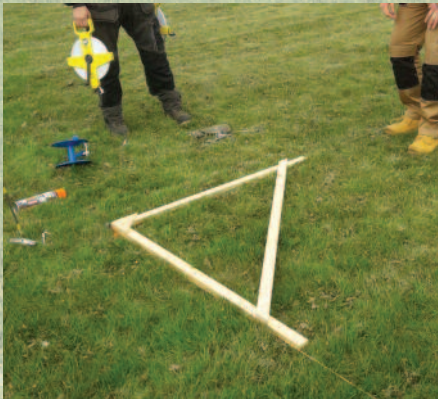

The Ugly.

DO YOU...

- **Struggle** in the peak growing season to Initial Mark sports pitches?
- Have **complaints** about wavy, inaccurate line markings?
- Have **rutted lines** from use of weedkiller to avoid repeat stringing?
- Commit two men to spend **two hours** stringing out a single pitch?
- Have **difficulty** recruiting skilled staff who can mark out from scratch?

We have a time machine...

TinyLineMarker

Using the most advanced robotic technology from Rigby Taylor means a full sized football pitch, with or without fixed sockets, can be initial marked in as little as 25 minutes!

All in good time

- › We take the stress away from the pre-season work load
- › Store all your pitch dimensions on a GPS autonomous Robot tablet
- › Provide a fast response if your lines wash out
- › Eliminate 'deep ruts' on the pitch due to worn away lines caused by weedkiller
- › Provide the opportunity for you to release labour for other important tasks

Contact us NOW

For a FREE, no obligation quotation of the following GPS line marking services using award-winning **Impact** ready-to-use paints:

- * Pre-season initial marking of football and/or rugby pitches (all pitch sizes)
- * Initial marking followed by regular interval (weekly, fortnightly) overmarking
- * In addition to football and rugby, the following sports surfaces can also be marked: American football, tennis, lacrosse and athletic running tracks
